

7FG Investigate the Natural History Museum

7Fg visited Oxford University Museum of Natural History to find out about animals and their life cycles and habitats. The pupils all reacted with high levels of curiosity and were also thrilled to encounter some dinosaurs!

Returning consent forms

As a school we manage a high volume of health related clinics, many of which require consent to be provided for a child to be seen. As such, it would be extremely helpful if families could return any consent forms received from school as promptly as possible, to minimise the impact on the office staff and ensure that children get access to the health input they require.

Student Council Fundraising Day

To raise much needed funds for the development of the Primary playground, classes across the school completed a number of laps of the Secondary playing field (120m per lap) which were combined together to total just over 10km! Pupils completed their distance, in a combination of running as a whole class or splitting in to pairs/groups to take turns doing laps. This was combined with a cake sale and raised over £600!! Thanks you so much for all your support and cake related contributions it really is greatly appreciated.

Parking on the school site

Whilst the end of the school day pick up can be a busy time that needs to be actively managed, it is important that families do not feel uncomfortable driving on to the school site to collect their children. If there are any difficulties with getting cars in to the space available, can these be directed to the member of staff on duty who can support the process as required.
